

Western Electric

ELECTRON TUBES

DESIGNS BY BELL TELEPHONE LABORATORIES

3/16/56

FOREWORD

*T*his bulletin presents in concise tabular form the essential data on Western Electric electron tubes, which are designed by Bell Telephone Laboratories. The text material has been selected and arranged with the view of guiding the circuit designer most readily to the Western Electric tube which will meet his requirements for particular applications. While certain special-purpose tubes designed for military applications and having limited fields of use have not been covered in this General Bulletin, information on them will be made available on request to those contemplating specific applications.

Price and Delivery Information

The Graybar Electric Company is the national distributor of Western Electric electronic products. To secure price and delivery information, contact your nearest Graybar office. A listing of the main Graybar offices throughout the country is presented on page 16 of this bulletin.

Technical Inquiries

It is the objective of the Western Electric Company to furnish to those engaged in the design, fabrication and use of electronic equipment all available information relating to our electron tubes and their application. If some special application or characteristic is required of a tube, we shall be glad to recommend a suitable type and to suggest design and operating precautions necessary for realizing the capabilities of such tubes. Please address all inquiries for technical information to:

WESTERN ELECTRIC COMPANY

Radio Division, Department 9713

Key to Symbols and Abbreviations

A-Audio — Class A Audio Frequency
 Ampl. — Amplifier
 Ampl. Fact. — Amplification Factor
 Amps. — Amperes
 B-Audio (2) — Class B Audio Frequency, 2 Tubes

B-RF — Class B Radio Frequency
 C-RF — Class C Radio Frequency
 Cur. — Current
 Diam. — Diameter
 Diss. — Dissipation
 F — Filament-Type Cathode
 F Air — Forced Air

Freq. F1 — Maximum Frequency for Operation at Full Plate Voltage
 H — Heater-Type Cathode
 Mc — Megacycles
 O — Oxide Coated
 Osc. — Oscillator
 PM — Plate-Modulated

SM — Suppressor Grid-Modulated
 Spl. Mtg. — Special Mounting
 T — Thoriated Tungsten
 Transcond. — Transconductance
 UM — Unmodulated
 W — Tungsten
 μ mhos — Micromhos
 * — National JX-100
